Vitamin D2 Ergocalciferol+ Vitamin D3 [25-OH] cholecalciferol) Interpretation:

LEVEL

REFERENCE RANGE

COMMENT

Deficient

<10ng/ml

High risk for developing bone disease Insufficient

10-30ng/ml

Vitamin D concentration which normalizes parathyroid hormone

concentration

Sufficient

>30ng/ml

Optimal concentration for maximal health benefit

Toxicity

>100ng/ml

High risk of toxic effect

Notes: The assay measures both D2 (Ergocalciferol) and D3 (cholecalciferol) metabolites of Vitamin D 25(OH) Dis Influenced by sunlight, latitude, skin pigmentation, sunscreen use and hepatic function It shows seasonal variation with values being 40-50% lower in winter than in summer Levels vary with age and are increased in pregnancy Comments: Vitamin D promotes absorption of calcium and phosphorus and mineralization of bones and teeth Deficiency in children causes Rickets and in adults lead to osteomalacia It can also lead to Hypocalcemia and tetany Vitamin D is best determined by measurement of 25hydroxy Vitamin D, as it is the major circulating form and has longer half life(2-3 weeks) than 1,25 Di hydroxy Vitamin D (5-8hours)

Decreased level:

Increased Level: - In adequate exposure to sunlight

- Vitamin D intoxication - Dietary deficiency - Vitamin D malabsorption - Severe Hepatocellular disease - Drugs like anticonvulsants - Nephrotic syndrome

USG - WHOLE ABDOMEN (FEMALE)

LIVER

: Liver is normal in size measuring 13.2 cm in craniocaudal diameter.
: Parenchyma is normal in echotexture. Intrahepatic ducts are not dilated.
: No focal lesion seen. The PV is normal.

GALL BLADDER

: Gallbladder is not visualized (History of cholecystectomy).

CBD

: Poor window for the CBD due to multiple lymphnodes at porta hepatis
: however visualized CBD appears normal.

PANCREAS

: Pancreas is normal in echotexture.

SPLEEN

: Spleen is enlarged in size and measures 12.3 cm in bipolar diameter.

KIDNEYS

: Both kidneys show grade-I echogenicity with maintained CMD.
: Right Kidney measures 8.4 x 3.5 cm and the Left is 10.5 x 3.3 cm. No hydronephrosis or calcifications seen.

URINARY BLADDER

: Urinary bladder is normal in outline.

UTERUS

: Uterus is senile and atrophic measures 5.4 x 2.6 cm. Endometrium thickness measures 2.0 mm. Myometrium and cervix are normal.

OVARIES

: Right ovary is normal in size measures 3.0 x 1.6 cm. Left ovary is bulky in size measures 4.6 x 3.2 cm and shows soft tissue echoic lesion within of approximate size 4.6 x 3.1 cm. On color doppler, vascularity noted within the lesion.

ANY OTHER FINDING

: Trace of fluid seen in abdominal cavity. No pleural effusion.
: Multiple variable sized lymphnodes are seen, few of them showing loss of fatty hilum at porta hepatis, peri-pancreatic, aorto-caval and peri-aortic region largest measuring 5.5 x 3.5 cm at porta hepatis.

Note : Please co-relate the finding clinically. Any discrepancy may kindly be brought to notice.

IMPRESSION:

*Bilateral grade-I echogenic kidney with maintained CMD. (Suggested – RFT Correlation).
Splenomegaly.*

Left ovary is bulky in size and having soft tissue echoic lesion showing vascularity within the lesion on color doppler.

Multiple variable sized lymphnodes are seen at porta hepatis, peri-pancreatic, aorto-caval and peri-aortic region, few of them showing loss of fatty hilum - ? Infective / Neoplastic.

— Suggested – CECT Whole Abdomen for further evaluation.
