

DSO Dashboard User Guide

Tableau Server Layout features:

-  Click on this icon on Top right corner to see in Full screen.
-  Click on this icon to generate the reusable URL link to share dashboard with other users, **Note: User must have access to the dashboard to be able to see it.**
-  Click on this icon on top right corner to Download dashboard view. User will get different download format option (image, pdf, power point, Cross tab) after on this step to download the dashboard view.
 - Note: this option will only download the data which is seen on the screen or in other words if there are filters applied on the dashboard it will download the filtered data
 - To download the data from individual metrics, use Cross tab download option to download the data.

Dashboard Layout:

Data Source:

- PSS cloud data is stored in oracle datasource, and Tableau dashboard is connected to oracle data source to fetch data directly. Tableau Dashboard is schedule to refresh data from oracle datasource everyday at 1:30am (PT).

Dashboard Functionalities:

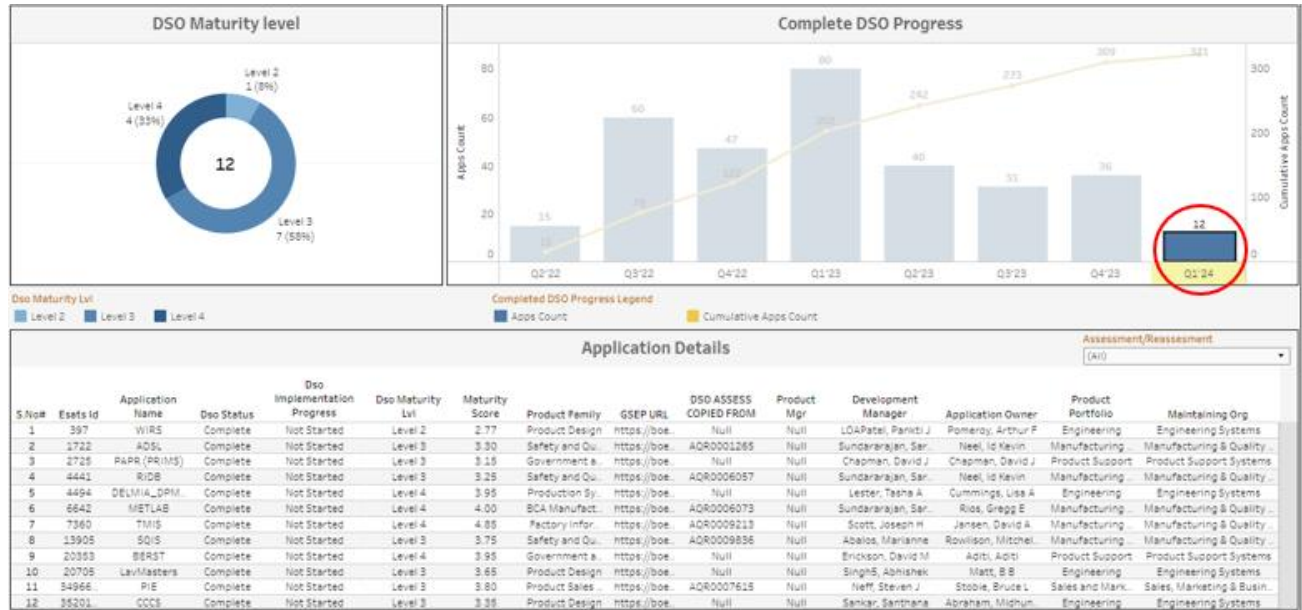

- Top Ribbon on the dashboard contains Name on the left side, Last Data Refresh time on the right side, Quick link to GSEP Dashboard.

DSO Dashboard User Guide

- Filter section gives user ability to filter dashboard metrics on various fields. By Default, no filter is selected on the dashboard.
 - Select the required filter option from the dropdown and click apply to filter data on the dashboard.
 - To remove filter selection, select all from the drop down and click apply on the relevant filter.

Maintaining Org	Product Family	Product Name	Product Mgr	Director	Development Manager	Application Owner	Dso Applicable	DSO Year
(All)	(All)	(All)	Null	(All)	(All)	(All)	(All)	(All)

- To see detail data for “DSO Maturity Level” and “Completed DSO Progress” metric, Click on the visualization to see relevant data in Application Detail section. To un-filter the data click again on the selected selection to unselect.

- Use Assessment/Re-assessment filter on in application details to see relevant data.
